-SEE OFFICE ACTION ON THE FOLLOWING PAGES-

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-4, drawn to assays for determining down regulation of an HIV coreceptor, classified in Class 435, subclasses 4 or 5.

II. Claims 5-6, drawn to methods of treating and/or preventing HIV infection, classified in Class 424, subclass 184.1.

The inventions are distinct, each from the other because of the following reasons:

The methods of Groups I and II each differ one from another in method steps, reagents, and utility and are novel and unobvious in view of each other. Therefore, the inventions of Groups I and II are patentably distinct.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and divergent subject matter, and because the searches for the individual Groups are not coextensive, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed. (37 C.F.R. 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. 1.48(b) and by the fee required under 37 C.F.R. 1.17(h).
